How to check your engines number.

John Deere Engine Model Overview

1. John Deere manufactures a variety of engine models in six major series (300, 350, 400, 450, 500 and 550). These engines may be offered as: *(D) naturally aspirated, (T) turbocharged, (A) turbocharged & after cooled, (H) and turbocharged with air-to-air after cooling.* Engines sold loose for use in equipment other than John Deere have an (F) in the serial number.

2. John Deere identifies their engine models by using the first digit to indicate the number of cylinders. The next three numbers indicate the displacement in cubic inches *(Example: Model 6-414D is a six cylinder naturally aspirated engine with 414 cubic inch displacement).*

- Sometimes the (-) is not included in the model designation *(Example: 6414D).*
- The newer metric engines are identified by number of cylinders and the displacement in liters. *(Example: Model 6068T is a six cylinder, turbocharged engine with a 6.8 liter displacement).*

Many engine parts used in metric engines are interchangeable with parts used in cubic inch engines.

3. John Deere began phasing in a new family of engines in 1994, which replaced the earlier models. These engines are called Powertech 350 and 450 Series engines. *They are identified as: Models 2.9 Powertech, 4.5 Powertech, 6.8 Powertech and 8.1 Powertech.* The Powertech engines have few interchangeable parts with the earlier models.

CAUTION: Do not confuse these new model numbers with earlier models. The 3029, 4045, and 6068 metric engine components are different from the Powertech 2.9, 4.5 and 6.8.

4. John Deere engines have been manufactured around the world, mainly in these three locations:

<i>300 Series</i>	<i>Manufactured in Dubuque, Iowa & Saran, France</i>
<i>350 Series</i>	<i>Manufactured in Saran, France & Torreón, Mexico</i>
<i>400, 450, 500 Series</i>	<i>Manufactured in Waterloo, Iowa</i>

The 300 Series engines previously manufactured in Dubuque and Saran are essentially the same. Although the component parts in engines manufactured in both locations may be the same and are interchangeable, some parts carry different numbers. Reliance utilizes the part number that is more commonly used.

5. John Deere utilizes the equipment model and serial number for identifying equipment, engines and parts. Many owners know their John Deere equipment only by model number and cannot identify their engine. A cross reference from John Deere equipment model numbers to John Deere engine models is included in the Reliance catalogue.

Identifying 300's Liter VS INCH Engines

On *four cylinder engines, two plugs are visible* on the side of the intake manifold.

On *six cylinder engines, three plugs are used*. Presence of these plugs is an easy way to identify a Liter engine from an Inch engine.

Identifying 300's Powertech engines

Below the serial number on the serial number plate, the model number for that engine is identified. The model number will conclude with the number "150", "151", "180", "220", "250", "275" or higher. This will indicate it is a "Powertech" engine. *Powertech engine also have the rocket cover studs along the centre of the rocker cover.*

Identifying 4045 & 6068 Tier2 and Tier3 against Tier 1 Powertech engines

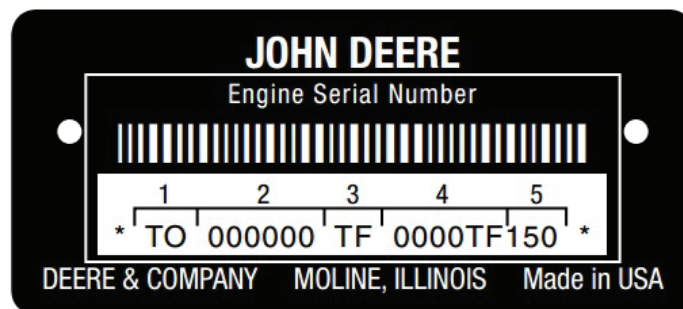

Tier 2 & Tier 3 engines have 4 Valves in the cylinder head as opposed to only 2 valves on the Tier 1

Engine Number Tags

Very few parts on most Powertech engine are interchangeable with the older series engines. We do not have the engine that you are working on in front of us; it is up to you to determine what engine you have. The following information may help you make this determination.

The Engine Serial Number tag can be found as either a one-line, or a two-line style.

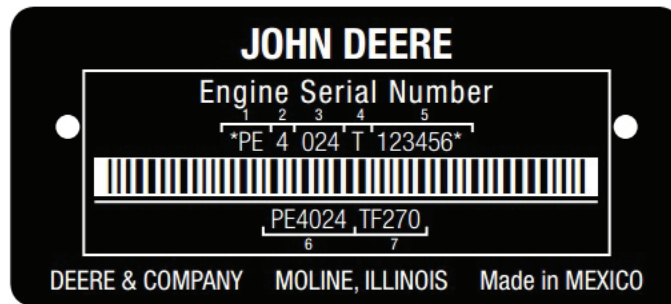

On either style if the number concludes with a 150 or higher it is a "Powertech"

Single line style

1. Engine manufacturer. "TO=Dubuque, RG=Waterloo, Ect..."
2. Number of cylinders & displacement "4045 = 4 cyl, 4.5 liter"
3. Fuel type or special condition. "DF=Non turbo Diesel, TF=Turbo Diesel"
4. Engine serial number.
5. Application/user. If this number ends in 150 or higher it is a "Powertech"

Engine Number Tags

Two line style

1. Engine manufacturer. "PE = Torreon, Mexico"
2. Number of cylinders. "4"
3. Displacement. "024 = 2.4 liter"
4. Type of air intake system. T = Turbocharged
5. Engine serial number.
6. The first six digits will be the same as items two through four from above.
7. Seven through eleven is application/user. If this number ends in 150 or higher it is a "Powertech"
